- Attach: (1) Modified Notification of Hazardous Waste Activity,  
McDonnell Aircraft Co., Tract I.
- (2) Revised Tables, Waste Analysis Plan, Final Hazardous Waste  
Storage Permit, McDonnell Aircraft Co., Tract I.

1. Because of the new TCLP test at 40 CFR 261.24, several hazardous wastes stored at McDonnell Aircraft's permitted Tract I storage facility will have a new TCLP waste code in addition to previous waste code(s). We are submitting a Class I permit modification request, as required by the 40 CFR 270.42 federal rule. We request that EPA provide its most recent facility mailing list, maintained under 40 CFR 124.10(c)(ix), so that we can make the required public notifications within 90 days.

2. Missouri has not yet incorporated the TCLP test into its rules. Since the TCLP definition was promulgated under HSWA, it is our understanding that EPA will implement the TCLP rule until the state is authorized to do so. It is also our understanding from the March 29, 1990 preamble to the TCLP rule (55 FR 11848) that permit modifications needed to comply with the TCLP rule are governed by federal permit rules.

3. The tables in our revised waste analysis plan incorporate the TCLP test, but also retain the EP toxic test, which is still part of Missouri rules. If you have questions about our modification request, please contact me at (314) 232-3319.
